

# World War 2 Spitfire

One of our students, Jim, has made an amazing replica of World War 2 Spitfire Aircraft.

Jim researched, designed and completed the replica in his Design Technology lessons and utilised his skills with the wood working tools in the workshop. He was able to transfer his Maths skills to estimate and produce the model sized plane. A brilliant effort and use of the knowledge he has gained during lessons.

The photos below of are of the fantastic result. Well done Jim!
